

THE DIRECTOR OF
CENTRAL INTELLIGENCE

National Intelligence Council

27 December 1982

MEMORANDUM FOR: Walt Elder, NFIB Secretariat
SUBJECT : The Attached

The attached report prepared by the DI and my instructions concerning the introduction of Wang machines into the NIC probably confirm your suspicions about the later rather than the earlier implementation of your NFIB network. I will be happy to answer any questions you have. I would not anticipate a resolution of this problem in less than six months to a year.

H. F. Hutchinson, Jr.
Vice Chairman

MEMORANDUM FOR: AO/NIC

25X1

SUBJECT : The Attached

1. This interim evaluation report on the Wang Alliance Office Automation System was prepared by an element of the DI. This conveys some substantial limitations and indicates to me that we should stop where we are with respect to changing our office machines.

2. Please inform all appropriate parties that we will stop with the one Wang machine we have and make no other changes pending further evaluation by the Directorate of Intelligence or convincing recommendations to me from other expert parties.

Fred Hutchinson
